

DANNY: I saw a little green geezer

‘Visitor’ was chopped out of UFO doc

EASTENDERS star Danny Dyer reckons he’s seen a video of a long-fingered alien breaking into a living room – and it’s convinced him that there is life on other planets. The truth is out there, you mugs.

DANNY Dyer was furious when footage that could prove aliens exist was cut from his UFO documentary.

The former EastEnders star has long-believed in flying saucers and investigated them for the BBC.

During filming, he met Stan Romanek who claims to have had experiences with aliens. But Dyer said he was “fuming” as he was not able to show a lot of the American’s potential evidence.

Producers showed a video of what looked like a white face at Romanek’s window – but Danny also saw footage of an alien inside the house.

Dyer said: “There was another one, which I thought wasn’t a mask, when it comes in.

“It gets in and he’s sort of screaming and that, and he’s in the living room and then you see the long fingers come round the door and it pulls its head round.”

Chatting on The Louis Theroux podcast, he went on: “I was like, either this is the truth and he’s showing me footage or it’s s***e and he’s lying to me.

“There is no in between.”
